CUCCOO *the bathroom furniture series with smart space-saving solutions*

- Can be installed in the front wall
- Extensive design selection
- Variety of cabinet sizes and formats
- Also combinable with front wall systems of other manufacturers

CUCCOO

Built-in furniture for wall installation

In a surprisingly elegant way, the cuccoo bathroom furniture series create extra storage space for all those things that need to find a discreet place in a tidy bathroom. They can not only be mounted on a wall, but also inserted in unused cavities of a front wall installation. Only glass doors, double mirror or wood finish are visible then.

Indispensable things that would disturb the overall picture in the aesthetics disappear discreetly behind the wall.

For example, the built-in cabinet with integrated toilet brush set provides extra space for spare toilet paper rolls.

CUCCOO

Built-in furniture for wall installation

Embedded flush with the wall, the furniture body disappears into the so-called front wall, a hollow wall projection, which the installer needed there to install pipes and connections as well as flush-mounted cisterns and instantaneous water heaters.

A front wall installation is a very clean and fast method because the specialist plumbers here need not mortise slots in existing walls for water pipes.

The front wall is made using Burda SANTRO, an industrially pre-fabricated installation system consisting of support frames and plasterboards that are fitted in front of the bathroom's masonry wall.

Thanks to Burda cuccoo, pipes can be laid and discreet storage space gained in this concealed cavity between masonry and the artificial wall. In addition, the built-in cabinets offer the further advantage of extra inspection openings: As the cabinets can be easily removed, the installer now also has a possibility later to reach the cables and components laid behind the tiles without having to knock off the same.

Cabinet sizes/formats

20 x 60 x 19 cm

20 x 60 x 19 cm

30 x 60 x 19 cm

40 x 60 x 19 cm

Design features

Door and carcass décors

The above materials and wood finishes are available for doors.

Please note that the pattern printed here may not match the actual colours and finishes due to technical reasons. Therefore, get your installer or interior designer to show you the original materials and decorative patterns.

The handle-less glass or double mirror doors made of laminated safety glass (LSG) have glued special tapes.

The handle-less doors in lacquer or wood finish are supplied with cushioned concealed hinges that ensure a soft closing of the door.

This is how you put together your cabinet ...

1. First, select the cabinet size:

2. Select the door finish:

* LSG glass not available for cabinet with toilet brush

Note: An adapter is not needed when using the Burda system SANTRO.

All other systems require, depending on the design of the cabinet, one of the following adapters:

50 CW profile, Geberit GIS*, Viega Steptec*, TECEprofile*, MEPA Varivit*

*Registered trademarks of each previously mentioned company
