

Buttons and contactless flushing systems

burda
Sanitärtechnik

Buttons **and contactless flushing systems**

- Large selection of flush buttons
- Hygiene benefit by contactless flushing systems
- Visually appealing design choice

BUTTONS

and contactless flushing systems

Due to the large selection of flush buttons, a custom bathroom design can be implemented in detail. Whereas the installation is concealed behind the wall, the flush buttons provide a way to create visual highlights besides the functionality.

Contactless flushing systems

Functionality and aesthetics are perfectly coordinated in the BurdaTronic line

A specific health benefit is provided by the contactless flushing systems, especially in public areas. They reduce the risk of infection, work to conserve water and are also indispensable in barrier-free extension.

Contactless urinal controls
