Santro Wall-WC module with concealed cistern

Design _____ Ref. no. _____

Geberit cistern Sigma
with 2-quantity flush

Installation height 1080 mm 611113.01

- Galvanised, self-supporting and sound-decoupled steel construction
- Single-layer (12.5 mm) GKFI construction panel, incl. all standard openings
- Sound-decoupled mounting rail
- WC ceramic fixtures 180 and 230 mm
- Connection elbow made of PE-HD, DN 90 mm
Incl. transition sleeve made of PE-HD, DN 90/110 mm
- Wall-mounted WC connection set
- Built-in, condensation-insulated concealed cistern
- Building protection for inspection opening
- Building plug for inlet and outlet pipe
- All fastening and mounting accessories
- Adjustable foot supports 0-220 mm
- Cistern connection with integrated or separate angle valve
- Actuation from the front

Dimensions: W / H / D 525 / 1080 / 160-220 mm

Accessories:

Flush plates from page 65

Note: WC power bearing for WC ceramics with contact surface smaller than 17 cm (e.g. Flaminia, Sentique), page 8

all WC frames with Geberit cistern:
compatible with Duravit Sensowash®
and Geberit AquaClean WCs

WC frames w. Geberit cistern Sigma:
also compatible with Geberit Duo-Fresh
inserts (cleaning cubes)

Santro wall-hung WC module with concealed cistern (825 mm)

Design _____ Ref. no. _____

Geberit cistern Omega
with 2-quantity flush

Installation height 825 mm 611190.00

- Galvanised, self-supporting and sound-decoupled steel construction
- Reduced shelf height
- Single-layer (12.5 mm) GKFI construction panel, incl. all standard openings
- Sound-decoupled mounting rail
- WC ceramic fixtures 180 and 230 mm
- Connection elbow made of PE-HD, DN 90 mm
Incl. transition sleeve made of PE-HD, DN 90/110 mm
- Wall-mounted WC connection set
- Built-in, condensation-insulated concealed cistern
- Building protection for inspection opening
- Building plug for inlet and outlet pipe
- All fastening and mounting accessories
- Adjustable foot supports 0-220 mm
- Cistern connection with integrated or separate angle valve
- Actuation from the front or top

Dimensions: W / H / D 525 / 825 / 160-220 mm

Accessories:

Flush plates from page 65

Note:
The toilet lid only remains in the open position if the distance between the wall and the wall to the toilet lid is > 25 mm.
When using WC ceramics such as those from Keramag: Renova Nr. 1, Comprimo 204550, Joly 203060, V&B: Viala 765310, Viala 765210, the flush plate must be mounted from above.

Note:
WC power bearing for WC ceramics with a support surface smaller than 17 cm (e.g. Flaminia, Sentique), page 8

all WC frames with Geberit cistern:
compatible with Duravit Sensowash®
and Geberit AquaClean WCs

WC frames w. Geberit cistern Sigma:
also compatible with Geberit Duo-Fresh
inserts (cleaning cubes)

Santro WC complete kit with concealed cistern for guest WC single unit up to 1250 cm wide

Design

Ref. no.

Geberit cistern Sigma
with 2-quantity flush
Actuation from the front

Installation height 1080 mm 611250.01

Geberit cistern Omega
with 2-quantity flush
Actuation from the front or top

Installation height 825 mm 611290.00

Consisting of: 1 x WC element suitable for standard wall-hung WCs

- Galvanised, self-supporting and sound-decoupled steel construction
- Single-layer (12.5 mm) GKF construction panel, incl. all standard openings
- Sound-decoupled mounting rail
- WC ceramic fixtures 180 and 230 mm
- Connection elbow made of PE-HD, DN 90 mm
- Incl. transition sleeve made of PE-HD, DN 90/110 mm
- Wall-mounted WC connection set
- Built-in, condensation-insulated concealed cistern
- Building protection for inspection opening
- Building plug for inlet and outlet pipe
- All fastening and mounting accessories
- Adjustable foot supports 0-220 mm
- Cistern connection with integrated or separate angle valve
- Actuation from the front or front/top

Dimensions: H / D 850 oder 1080 / 160-220 mm
Suitable for single WC system (guest WC) max. width 1250 cm

Accessory pack included (separate accessory pack):

2 x subcarrier

For extending an extension section and for bridging distances over 625 mm wide between 2 sanitary modules etc.

2-tlg. GKF construction panel

450 mm wide, core-impregnated, fibre-reinforced plasterboard

Accessories optional:

Flush plates from page 65

Note:

WC power bearing for WC ceramics with contact surface smaller than 17 cm (e.g. Flaminia, Sentique), page 8

Santro WC module with concealed cistern for floor-standing WC

Design

Ref. no.

Geberit cistern Sigma
with 2-quantity flush

Installation height 1080 mm 611236.01

- Galvanised, self-supporting and sound-decoupled steel construction
- Single-layer (12.5 mm) GKF construction panel, incl. all standard openings
- Sound-decoupled mounting rail
- Connection elbow made of PE-HD, DN 90 mm
- Incl. transition sleeve made of PE-HD, DN 90/110 mm
- WC connection set, white with cover rosettes
- Built-in, condensation-insulated concealed cistern
- Building protection for inspection opening
- Building plug for inlet and outlet pipe
- All fastening and mounting accessories
- Adjustable foot supports 0-220 mm
- Cistern connection with integrated or separate angle valve
- Actuation from the front

Maße: W / H / D 525 / 1080 / 160-220 mm

Accessories:

Flush plates from page 65

Note:

WC power bearing for WC ceramics with contact surface smaller than 17 cm (e.g. Flaminia, Sentique), page 8

all WC frames with Geberit cistern:
compatible with Duravit Sensowash®
and Geberit AquaClean WCs

WC frames w. Geberit cistern Sigma:
also compatibel with Geberit Duo-Fresh
inserts (cleaning cubes)

Santro WC module with concealed cistern for floor mounted children WC

- Galvanised, self-supporting and sound-decoupled steel construction
- Single-layer (12.5 mm) GKF construction panel, incl. all standard openings
- Sound-decoupled mounting rail
- Connection elbow made of PE-HD, DN 90 mm
Incl. transition sleeve made of PE-HD, DN 90/110 mm
- WC connection set, white with cover rosettes
- Built-in, condensation-insulated concealed cistern
- Building protection for inspection opening
- Building plug for inlet and outlet pipe
- All fastening and mounting accessories
- Adjustable foot supports 0-220 mm
- Cistern connection with integrated or separate angle valve
- Actuation from the front

Dimensions: W / H / D 525 / 1080 / 160-220 mm
WC installation at a height suitable for children

Accessories:

Flush plates from page 65

For cladding shafts and pipe runs as well as for mounting fitting plates
(using spacer rails 677 034 or 677 033, page 14)
For bath and shower mixers or mirror cabinets etc.

- Galvanised, sound-insulated steel construction, consisting of 2 side panels
- 2 spacer rails of 3 metres each for fanning out
- All fixing and mounting accessories

Santro spacer rail

Design	Ref. no.
Länge 1080 mm	677034
Länge 3000 mm	677033

For installation in shaft elements (Type 190, 135, 190 E, 135 E) and between intermediate supports (all types)
For stabilisation and / or for holding fitting plates,
Frame for installation rail

- Galvanised sheet metal

Santro fitting plate C1 for standard concealed taps

Design	Ref. no.
	680736

For installation in shaft elements (Type 190, 135, 190 E, 135 E) and between intermediate supports (all types)
For stabilisation and / or for holding fitting plates,
Frame for installation rail

- Galvanised steel construction
- 4 sound-insulated pipe clamps
- All fixing and mounting accessories

Santro fitting plate A for surface-mounted fittings

Design	Ref. no.
	681658.00

For mounting using spacer rails (677 034) between 2 sanitary modules or between module and intermediate support or only between intermediate supports or in a shaft element.

- Galvanised steel construction
- 2 wall bushings 1/2"
- complete mounting and assembly accessories

Santro fitting plate B for shower connection or single tap system

Design	Ref. no.
	681689.00

For mounting using spacer rails (677 034) between 2 sanitary modules or between module and intermediate support or only between intermediate supports or in a shaft element.

- Galvanised steel construction
- 2 wall bushings 1/2"
- complete mounting and assembly accessories

Santro fitting plate D for hydraulically controlled instantaneous water heaters

Design	Ref. no.
only 1/2' available	681740.00

For mounting using spacer rails (677 034) between 2 sanitary modules or between module and intermediate support or only between intermediate supports or in a shaft element.

Description of system

1.1 BS+

The BS+ installation range is the universally applicable, industrially pre-assembled element system for stud wall and front wall installation.

1.1.1 Elements

This extensive range includes elements for toilets but also for urinals, bidets and wash-stands, as well as the corresponding elements for barrier-free construction. Ready-made elements are even available for special applications such as countertop washbasins with wall fittings, water metres or urinal electronics.

1.1.2 Free choice of connections

With all units the fitter is free to choose between cisterns from various brand manufacturers and decide for himself what type of pre-fitted connection should be supplied with the element.

1.2 Application area

The BS+ is the flexible dry construction installation system for front wall installation or for fitting into a stud wall.

The application areas for this system are therefore building sites where drywallers are also expected to be included in handling the job.

In front of stud wall

In stud wall

In front of solid wall

1.3 Benefits

The BS+ installation range offers fitters and planners the opportunity to create complete installations in classic dry constructions and to resort to pre-assembled units. Individual solutions can be flexibly planned in this way.

Assembly instructions for fitting in stud walls

1.1 Perfect and installation-friendly

For new builds, renovations, loft conversions and the commercial sector: Light construction wall with integrated fastening and connection options for sanitary units are in line with modern building technology.

The BS+ system from Burda gives you a fully galvanised, self-supporting design for fitting sanitary units into light construction walls. This is an installation-friendly system for fitting individually into the C-profiles of a stud wall.

1.2 Design of the light constructions walls

The BS+ elements from Burda are designed to be fitted in stud walls according to DIN 18183, November 1988 edition, walls made out of plasterboard panels (design of metal stud walls) or wooden stud walls, with a load bearing capacity in accordance with DIN 18183. In so-called wet rooms with metal stud wall and BS+ Plus sanitary units planking should be done with double-layer, impregnated firecheck plasterboard panels.

When fitting WC installations suitable for old and disabled people, reinforced UA profiles must always be used!

Installation example:

metre mark to the standing C-profiles.

Inserting the element into the stud wall.

Metre mark on the stud wall align with the marking on the panel. (B)

Height adjustment of the element is done by adjusting the feet of the element. (A)

- Loosen nut
- Move foot to required size
- Tighten nut

Align the outer edges of the element flush with the outer edges of the stud wall and fix the position. (C)

Screw the aligned stud wall panel combination to the side and to the floor.

Note: The panelling must always be fully seated and screwed down without any gaps.

Installation instructions for installation in a pre-wall installation

① Fasten the U-profile to the floor at the required distance to the wall and place the BS+ element into it. Install the two wall brackets supplied as accessories to the BS+ element and adjust the gap between the element and the wall with the aid of the wall brackets. Make the wall brackets face downwards or to the side. Cut the threaded rods off so that they no longer protrude from the element. Tighten the lock nuts.

② On the left and right of the element, use the self-tapping screws to fasten a C-profile on each side, which are additionally joined to the U-profile with pop rivets at the bottom.

Note: As a matter of principle, all C and U-profiles are joined with pop rivets or profile connecting pliers.

③ Put another U-profile over the element in the required length, which will act as a shelving area.

④ Fan out the levels in which the panels are located. Every 625 mm, a C-profile must be fanned out or a new panel placed.

⑤ Now attach another U-profile (back to the wall) at the same height as the top edge of the element.

⑥ Plank this construction with plasterboard suitable for damp rooms. The panelling must always be double with no gaps! Additional screws must be used in the WC area!

Can be installed in a stud wall or as a single element using wall brackets for pre-wall installation

- The elements consist of 48 mm wide profiles, so they can be perfectly installed in a 50 plasterboard stud wall.
- GKFI building boards can be installed be placed butt to butt
- Fastening the building boards without pre-drilling
- Sound decoupling integrated as standard (all red plastic parts)
- Element feet as standard 220 mm extendable
- High corrosion protection due to sendzimir galvanised elements
- 4-point fastening
- All current standards are complied with (e.g. DIN 4109 etc.)

BS+ wall-hung WC element with concealed cistern Height 1120 mm

- Galvanised, self-supporting and sound-decoupled steel construction
- WC ceramic fixtures 180 and 230 mm
- Connection bend made of PE-HD, DN 90 mm
Incl. transition sleeve made of PE-HD, DN 90/110 mm
- Wall-mounted WC connection set
- Built-in, condensation-insulated concealed cistern
- Building protection for inspection opening
- Construction plug for inlet and outlet pipe
- All mounting and assembly accessories
- Adjustable footrests up to max. 0-220 mm
- Cistern connection bracket (exception 211 009.99)
and integrated or separate angle valve
- Actuation from the front

Dimensions: W / H / D 525 / 1120 / 160 mm (with waste pipe)
Suitable for standard wall-hung WCs.

Accessories:
Sound-decoupled wall brackets for pre-wall installation, page 47

Design

Ref. no.

Installation height 825 mm 233002.xx

Installation height 980 mm 223002.xx

Installation height 1120 mm 213002.xx

- Galvanised, self-supporting and sound-decoupled steel construction
- Variable bidet ceramic fittings
- swivelling HT urinal trap DN 50
- Rubber nipple 32 mm
- All fastening and mounting accessories
- Adjustable footrests up to max. 0-220 mm
- 2 sound-decoupled, width-adjustable wall discs 1/2"

Dimensions: W / H / D 525 / 825, 980 oder 1120 / 130-160 mm
(with waste pipe), suitable for bidets, see fitting list (enclosed in the box)

Accessories:

Sound-decoupled wall brackets for pre-wall installation, page 50

Note:

Replace end number .xx with .00 for standard connection 1/2" x 1/2"
.99 without connection

Note:

With some ceramics, it may be necessary to mount the supplied clamp in the crossbar from below rather than from above, so that the abutment (absorbs the force of the ceramic) as close as possible to the back of the ceramic.

In some assembly cases, it may also be necessary the threaded rod must be shortened accordingly.

These points should be clarified beforehand by looking at the ceramic.

As the manufacturer, we do not accept any liability for incorrect installation!

BS+ urinal element with concealed flush valve or shell set and empty element

- Galvanised, self-supporting and sound-decoupled steel construction
- Mounting plate for variable urinal installation
- Adjustable, sound-decoupled water inlet traverse
- Adjustable drain crossbar
- swivelling drain elbow DN 50
- Pre-assembled flush-mounted flush valve or pipework set
- Construction protection for inspection opening
- All fastening and mounting accessories
- Adjustable footrests up to max. 0-220 mm
- Connection 1/2"
- Urinal trap (#255101, 255102, 255103 und 255104 ohne),
- Urinal connection set (#255101, 255102, 255103 und 255104 ohne),

Dimensions: W / H / D 525 / 1120-1250 / 80 mm

Accessories:

Sound-decoupled wall brackets for pre-wall installation, page 50

Note:

Suitable for urinals, see fitting list (enclosed in the box).

- All fastening and mounting accessories
- Sound-decoupled, width-adjustable 1/2" wall ducts

Dimensions: W / H / D 525-575 / 180 / 38 mm

Design	Ref. no.
A: with 2 wall ducts	215006.00
B: with 1 wall duct	216210.00

BS+ universal traverse
for surface-mounted taps / tap valve

- Galvanised sheet metal construction
- Lateral fastening option on CW profiles of a stud wall
- All fastening and mounting accessories
- Sound-decoupled wall discs 1/2"

Dimensions: W / H / D 500-575 / 140 / 72 mm

Design	Ref. no.
A: with 2 wall ducts	215005.00
B: with 1 wall duct	216209.00

BS+ traverse for washing machine

incl. device-connection valve

- Galvanised sheet metal construction
- Lateral fastening option on CW profiles of a stud wall
- All fastening and mounting accessories
- Urinal trap WM and wall disc 1/2"

Dimensions: W / H / D 500-575 / 140 / 72 mm

Design	Ref. no.
with urinal trap WM and 1/2" connection	216004

BS+ Traverse for kitchen sink

- Galvanised sheet metal construction
- Lateral fastening option on CW profiles of a stud wall
- All fastening and mounting accessories
- Two sound-decoupled wall discs 1/2"
- Drain elbow DN50

Dimensions: W / H / D 500-575 / 140 / 72 mm

Design	Ref. no.
with wall discs and drain elbow DN50	216100.00
with drain elbow DN50	215013

BS+ traverse for flush-mounted fittings / flush-mounted valves

- Galvanised sheet metal construction
- Lateral fastening option on CW profiles of a stud wall
- All fastening and mounting accessories

Dimensions: W / H / D 525-575 / 220 / 72 mm

Design	Ref. no.
with 4 sound-decoupled pipe clamps to hold the concealed valves	216003

BS+ traverse for water meter

Design	Ref. no.
	215015

- Galvanised sheet metal construction
- Lateral fastening option on CW profiles of a stud wall
- All fastening and mounting accessories
- 2 flush-mounted single-pipe connection piece for MTK / MTW-NG (2" EAS KOAX) incl. dummy cover and gasket set
- 2 Concealed piston valve, free of dead space and low pressure loss (DIN DVGW tested with sound insulation to DIN 4109 (fitting group 1))
- 4 sound-insulated brackets
- 2 two-part polystyrene insulations - building material class B1 (permissible operating overpressure PB: 10 bar, permissible operating temperature TB: 90°C, flow medium: drinking water)

Dimensions: W / H / D 525-575 / 250 / 160 mm

BS+ Washbasin traverse for floor-standing tap

version A

version B

Design	Ref. no.
Version A with mounting plate made of plywood	230300.xx

Design	Ref. no.
Version B with fastening via threaded rods	230301.xx

For installation in a stud wall in accordance with DIN 18183.

- Galvanised sheet metal construction
- Mounting plate for variable washbasin installation
- swivelling urinal trap DN 50
- Rubber nipple 32 mm
- All mounting and installation accessories
- Fitting plate to hold the wall discs
- 2 sound-decoupled connection mountings
- Wall discs 1/2"

Version A Dimensions: W / H / D 525 / 485 / 70 mm

Version B Dimensions: W / H / D 525 / 485 / 50 mm

Note:

Replace end number .xx with .00 for standard connection 1/2" x 1/2"
.99 without connection

BS+ universal mounting plate

For holding, supporting and folding handles

Design	Ref. no.
	240015

For holding mirrors, shelves, grab rails, support and folding handles et cetera

For installation in a stud wall in accordance with DIN 18183.

- Galvanised sheet metal construction
- built-in mounting plate made of plywood (245 mm high, 30 mm thick) for individual fastening of heavy loads
- All mounting and installation accessories

Dimensions: Plywood panel W / H / D 625 / 245 / 30 mm
With fixing bracket W / H / D 625 / 685 / 30 mm

BS+ right / left holding element with one foot for holding, supporting and folding handles

Design	Ref. no.	Design	Ref. no.
Installation height 980 mm right	240043	Installation height 1120 mm right	240023
left	240044	left	240024

Can be used for installation in a pre-wall.

- Galvanised, self-supporting and sound-decoupled steel construction, with one profile, with built-in fastening plate made of laminated wood (250 mm high, 30 mm thick) for individual fastening of heavy loads
- All fastening and mounting accessories
- Adjustable footrests up to max. 0-220 mm

Dimensions: W / H / D 230 / 980 oder 1120 / 50 mm

Accessories:
Sound-decoupled wall brackets for pre-wall installation, page 50

BS+ / Santro WC support brackets for WC ceramics with a small contact surface

Design	Ref. no.
1 Paar	216400

For additional support of WC ceramics
Support surfaces smaller than 17 cm (e.g. Flaminia, Sentique)

Side end element right / left

Design	Ref. no.
Installation height 825 mm right/left	on request
Installation height 980 mm right/left	on request
Installation height 1120 mm right/left	219001

Can be used for installation in a pre-wall.

For extending an extension section and for bridging distances
distances over 625 mm wide between sanitary modules et cetera

- Galvanised, self-supporting and sound-decoupled steel construction, with one profile, with built-in fastening plate made of laminated wood (250 mm high, 30 mm thick) for individual fastening of heavy loads
- All fastening and mounting accessories
- Adjustable footrests up to max. 0-220 mm

Dimensions: W / H / D 48 / 825, 980 oder 1120 / 48 mm

Accessories:
Sound-decoupled wall brackets for pre-wall installation, page 50

BS+ extension for wall bracket for wall mounting (240008 and 240012) up to 400 mm

Design	Ref. no.
	240010

BS+ extended feet

Design	Ref. no.
For floor construction up to 400 mm (1 pair)	215101
For floor construction up to 600 mm (1 pair)	215100

- For raised floor construction
- Suitable for all BS+ elements
- Version: In pairs
- Galvanised with plastic feet

BS+ corner mounting set

Design	Ref. no.
1 pair	218106

For mounting BS+ units as a 45° corner solution.

- Galvanised mounting bracket
- Additional upper corner planking support
- All mounting and assembly accessories

Sound-decoupled wall bracket for front wall mounting, mounting depth 140 -190 mm extendable

Premium wall bracket (since January 2018)

Wall bracket

Design	Ref. no.
Premium wall bracket	240012
Wall bracket	240008

- New version**
- 2 sound-decoupled wall supports M10
 - All mounting and assembly accessories
 - 2 support brackets
- Old version**
- 2 sound-decoupled wall supports M10
 - All mounting and assembly accessories

BS+ foot mounting on rear wall e.g. for underfloor heating

Design	Ref. no.

Burda Vorwand-Block-System

1.1 Einsatzbereich

- Vorwandinstallation Nassbau
- Vorwandinstallation Trockenbau
- Inwandinstallation Trockenbau

1.2. Aufbau

Verzinkte Profilzargenkonstruktion mit körperschallentkoppelten Einbauteilen (Spülsysteme, Armaturen, Leitungen), wählbarem Abwasseranschluss und stufenlos verstellbaren Standfüßen.

Leistung und Technik am Beispiel des Burda-Block für Wand-WC

Baurobuste, selbsttragende, korrosionsgeschützte Profilzargenkonstruktion (verzinkt)

Körperschallentkoppelte Sanitärtechnik (Spülsysteme, Armaturen, Leitungen)

Abwasseranschluss wahlweise PE-HD oder Gusseisen

Stufenlos höhenverstellbare Standfüße von 20 bis 200 mm

Moderne, wassersparende WC-Spülsysteme

Flies-, putz- und beplankungsfähige Schlitzbrücken-Metalloberfläche

Inklusive WC-Anschlussgarnitur und Montagezubehör für Rohmontage

Montageraumabdeckung (MRA) als Widerlager zur Benutzerlastenaufnahme, d. h. Ausmauerung nicht erforderlich!

Hinweis: Alle Montageanleitungen, sonstige Unterlagen und Prüfzeugnisse finden Sie im Download-Bereich unter www.burda-online.com

my move WC comfort for barrier-free WC facilities
with electric height adjustment

suitable for: pre-wall

scope of delivery

Self-supporting drywall element made of powder-coated, self-supporting steel construction for wall and floor mounting incl. fixing material.
(Sound-decoupled with premium wall bracket) for floor structures 0-20 cm with prefabricated internal drinking water and waste water pipework, as well as internal electrical wiring

without support handles

- With concealed cistern K840
- With electric lifting device for WC
- With glass top RAL 9003, signal white, W/H: 500 x 1045 mm
- With radio remote control
- With fibre-reinforced, core-impregnated plasterboard front (2-ply) with all control openings
- Stainless steel protection plate for inspection work

technical data

- WC attachment 180 mm
- WC 30 cm height-adjustable
- Load capacity up to 350 kg

connections:

Electrical connection: via Schuko plug (230 V AC, 50-60 Hz)
Waste water connection: DN 90, Drinking water connection: R1/2"

optional

- Individual glass panel colour according to RAL
- Panelling for individual installation RAL Classic colours
- Panelling for individual installation RAL Design colours
- Preparation for inclusion of shower toilet
- External button „up/down“
- External button „flush“

Dimensions: W / H / D 640 / 1265 / 200 mm

compatible with Duravit Sensowash®
