

Kombiset

Mounting element for brickwork with concealed cistern Geberit Sigma

Design of the element frame as a frame (door)

- The masonry is thus integrated into the frame.
- The result is a force-fit connection of the entire element.
- Double safety thanks to 4-point attachment.

View from above

- Mounting units suitable for commercially available ceramic bodies
- Brick lining elements for WC, bidet, washstand and urinal
- with WC ceramic attachment, optionally with 180 mm or 230 mm distance
- Drain pipe can be installed both vertically and laterally when mounted with feet
- Complete mounting unit for wall mounting/pre-wall installation, galvanised
- Pre-assembled with concealed cistern Geberit, flush pipe and adjusted drain elbow
- Complete with fastening, screws, plugs and wall-mounted WC connection set
- Guaranteed stability thanks to support brackets in the fixing zone of the WC ceramic appliance
- Additional stability and friction-locked connection due to frame design
